apartments are a fantastic option for enjoying the unique climate of this area.

The homes within this brand new Costa del Sol boutique development have been meticulously designed and built to the highest construction standards, including finishes and features. The developer sought to make the most of the location, optimising features such as the orientation, privacy and respect for the environment. The design aims to be respectful of the surrounding nature and strengthen the location's environmental characteristics.

The penthouses have large sun deck terraces and small jacuzzi-style whirlpools, while the homes on the ground floor have their own private garden. There are only 9 units on this luxury development so they won't be around for long.
